

Northwestern Medicine Geriatrics Virtual Memory Care Clinic

Comprehensive Memory Care for Older Adults From Home

The Northwestern Medicine Geriatrics Virtual Memory Care Clinic offers many benefits for older adults, particularly:

People with mobility challenges

People with advanced cognitive conditions

People living in areas far from care locations

Our board-certified geriatricians are dedicated to delivering exceptional care tailored to your needs.

Services we provide

Comprehensive geriatric cognitive assessments to adults 65 and older from the comfort of their home:

- Diagnosis and treatment of mild cognitive impairment and dementia, including:
 - Alzheimer's disease
 - Vascular dementia
 - Lewy body dementia
 - Parkinson's disease dementia
 - Frontotemporal dementia

Resources and support for patients and their caregivers

Advance care planning

Management and treatment of behavioral disturbances in dementia

What to expect during a virtual visit

We use a team-based approach that includes a geriatric medicine physician, nurse and social worker.

Your appointments will be a video call on your tablet, smartphone or computer. They will include time for you and a caregiver to each meet with the team member. They will:

Review your medications, focusing on ones that are high risk for older adults.

Assess your fall risk.

Provide cognitive testing.

Review and order diagnostic imaging if needed

Evaluate you for any other health issues common in older adults.

For more information or to make an appointment, call 312.695.4525 (TTY: 711).

What you need for your first appointment

A computer, tablet or smartphone that can take video

A MyNM account (sign up at nm.org/mynm if needed)

Completed new patient form (we send you that when you schedule the appointment)
